

1. BASE MACHINE

1-1 Dimensions

SPECIFICATIONS

2-2 Working range

- (1) The working radius means the horizontal distance from the center of swinging to hook center.
- (2) The height above ground means the perpendicular distance from the ground to the center of the main boom point shaft (or auxiliary jib point shaft).
- (3) The hook clearance means the distance from the hook point where the hook block can be hoisted to the highest position to the boom point shaft.

SPECIFICATIONS

2-2 Working range

- (1) The working radius means the horizontal distance from the center of swinging to hook center.
- (2) The height above ground means the perpendicular distance from the ground to the center of the main boom point shaft (or auxiliary jib point shaft).
- (3) The hook clearance means the distance from the hook point where the hook block can be hoisted to the highest position to the boom point shaft.

SPECIFICATIONS

2. STANDARD CRANE

2-1 Major specifications

Lifting capacity	Main hoist	Max. lifting load × working radius	50t × 3.7 m (Main jib length 11.2 m)
	Aux. hoist	Max. lifting load × working radius	3t × 8.3 m
Boom length	Main boom	Basic (Retracted most)	11.2 m
		Maximum	34.0 m
	Aux. jib		6.7 m , 11 m
	Max. combination of main boom + aux. jib		
Working range	Main boom	Working radius	3.7 m ~ 28 m
	Aux. jib	Working radius	8.3 m ~ 28.8 m
	Main boom	Max. lifting height	33 m
		(Equipped with 24-m main boom)	
	Aux. jib	Max. lifting height	About 45 m
	Main boom	Boom angle	26° ~ 80°
Rope part of line	Main hoist	50-ton hook	10-part of line
	Aux. hoist	5-ton hook	1-part of line
Counterweight	7.4 ton + 7.4 ton		14.8 t
Working weight			About 55.8 t
Average grounding pressure			0.67 kg/cm ²

SPECIFICATIONS

2-3 Rated overall lifting load

When extending crawler

(Unit : tf)

Working radius (m)	Main jib length (m)
