<b>TOTAL RATED LOADS</b>
--------------------------

- The total rated loads shown are for the case where the outriggers are set horizontally on firm level ground. The values above the bold lines are based on the crane strength while those below are based on the crane stability.
- The weights of the slings and hooks (100t hook: 820kg, 50t hook: 700kg, 8t hook: 250kg) are included in the total rated loads shown.
- The total rated load is based on the actual working radius including the deflection of the boom.
- The table below shows the classification of Performances A to I of the total rated load.

Counterweight Outrigger extension width	21t	16t	9t	5t or 0t
<b>7.2m</b>	A	B	E	G*
<b>6.36m</b>	C	D	F	G*
<b>4.9m</b>	E	F	G	H*
<b>4.0m</b>	F*	G*	H*	H*
<b>2.53m</b>	/	/	/	I*

Performances with \* are only for the boom performance.

Performance H shall apply to the 12.2m boom and 21.1m boom.

Performance I shall apply to the 12.2m boom.

- The table below shows the standard number of part lines for each boom length. The load per line should not exceed 8.0t for the main winch and the auxiliary winch.

A	12.2m	21.1m		30.1m		39.0m	46.2m	48.0m	J
T	I, II	I	II	I	II	I, II	I	I, II	/
H	13	7	4	5	4	4	4	4	1

A= Boom length    T= Telescoping method    H= No. of part-lines    J= Jib/Single top

- The total rated load for the single top shall be the value obtained by subtracting the weight of the hook mounted to the boom from the total rated load of the boom and must not exceed 8.0t.
- The total rated load for the jib differs for boom lengths of less than and greater than 46.2m.
- Jib operation should be performed on the basis of the boom angle. The working radii are reference values for the case where a jib is mounted to a 46.2m or 48.0m boom.
- Mark  $\alpha$  in the total rated load chart shows the boom angle range (under no load)
- The jib should be operated with the boom "telescoping method I".
- When the maximum instantaneous velocity is 10m/s or more, stop crane operation.

Performance A

**NOTES:**

1. The deflection of the boom is not incorporated in the figure above.
2. The above figure is for the boom "telescoping method".
