

Product advantages Mobile crane 1090/2

Max. lifting capacity: 90 t at 3 m radius

Max. height under hook: 72 m with biparted swing-away jib

Max. radius: 56 m with biparted swing-away jib

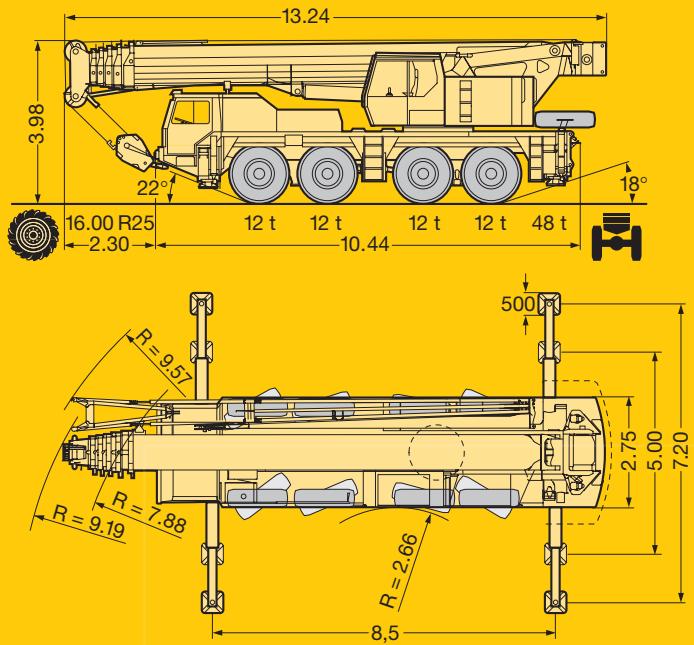

Performance profile of the LTM 1090/2 at a glance.

- Outstanding range of lifting capacities; counter-weight versions 1.2 t, 3 t, 7 t, 12.2 t and 20 t
- Robust 300 kW/408 h.p. Liebherr turbo-charged Diesel engine (Euro II)
- Compact and manoeuvrable due to all-wheel steering, smallest turning radius 7.8 m
- Travel control and setting on outriggers from crane cab (optional)
- Convenient electric/electronic crane control with integrated LICCON system
- 6-section telescopic boom of utmost stability, length 11.7 m - 52 m and 10.8 m - 19 m long biparted swing-away jib
- New rapid-cycle telescoping system "Telematik" with one telescopic ram interlocking laterally the telescope end sections. The end sections of the telescopes are interlocked with one another by pins. Automatic and manual telescoping practicable.
- LICCON, the most modern crane computer system world-wide, with informative, monitoring and control functions
- Diesel engine, slewing rim, slewing gear, winches and hydraulic pump are self-manufactured, quality checked components
- The LTM 1090/2 is manufactured by Liebherr within the scope of a quality assurance system according to DIN ISO 9001

LIEBHERR

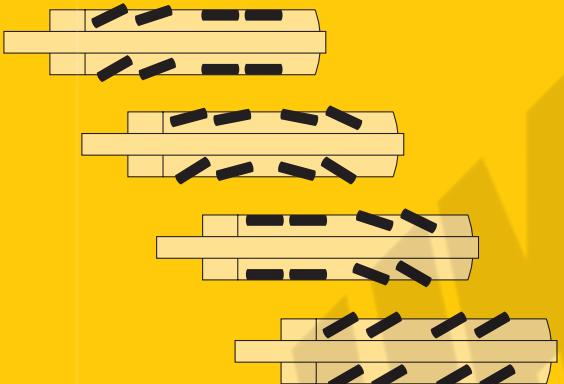

The better crane.

CD-

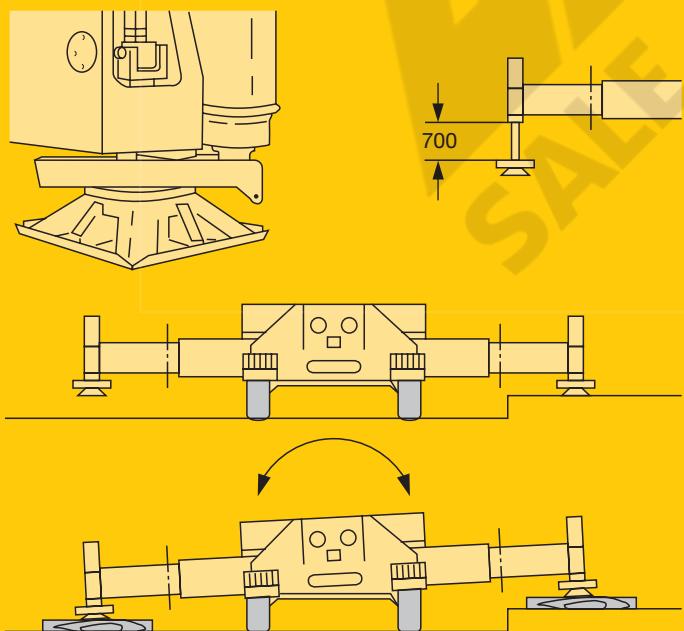

Compact, manoeuvrable and weight-optimized.

- Overall length just 13.24 m, length of carrier 10.44 m only
- Large overhang angles, up to 22°
- Small turning radius of 7.88 m with all-wheel steering
- 48 t total weight, incl. 1.2 t counterweight, drive 8 x 8, TELMA-type eddy current brake, 16.00 tyres, biparted swing-away jib of 19 m, 50 t hook block (axle load 4 x 12 t)
- 2 optional tyre sizes
14.00 R 25 - vehicle width 2.75 m
16.00 R 25 - vehicle width 2.75 m

Variable drive and steering concept.

- Drive 8 x 6: axles 1, 3 and 4 driven; 3rd and 4th axles are driven for road travel, 1st axle activatable for rough-terrain operation
- Drive 8 x 8: all axles driven; axles 3 and 4 driven for road travel, 1st and 2nd axle activatable for rough-terrain operation
- Standard all-wheel steering, 3rd and 4th axle also steerable independent of axles 1 and 2 (crab steering), the additional hydraulic steering is mechanically locked for road travel. All steering versions can also be controlled from the crane cab (optional).

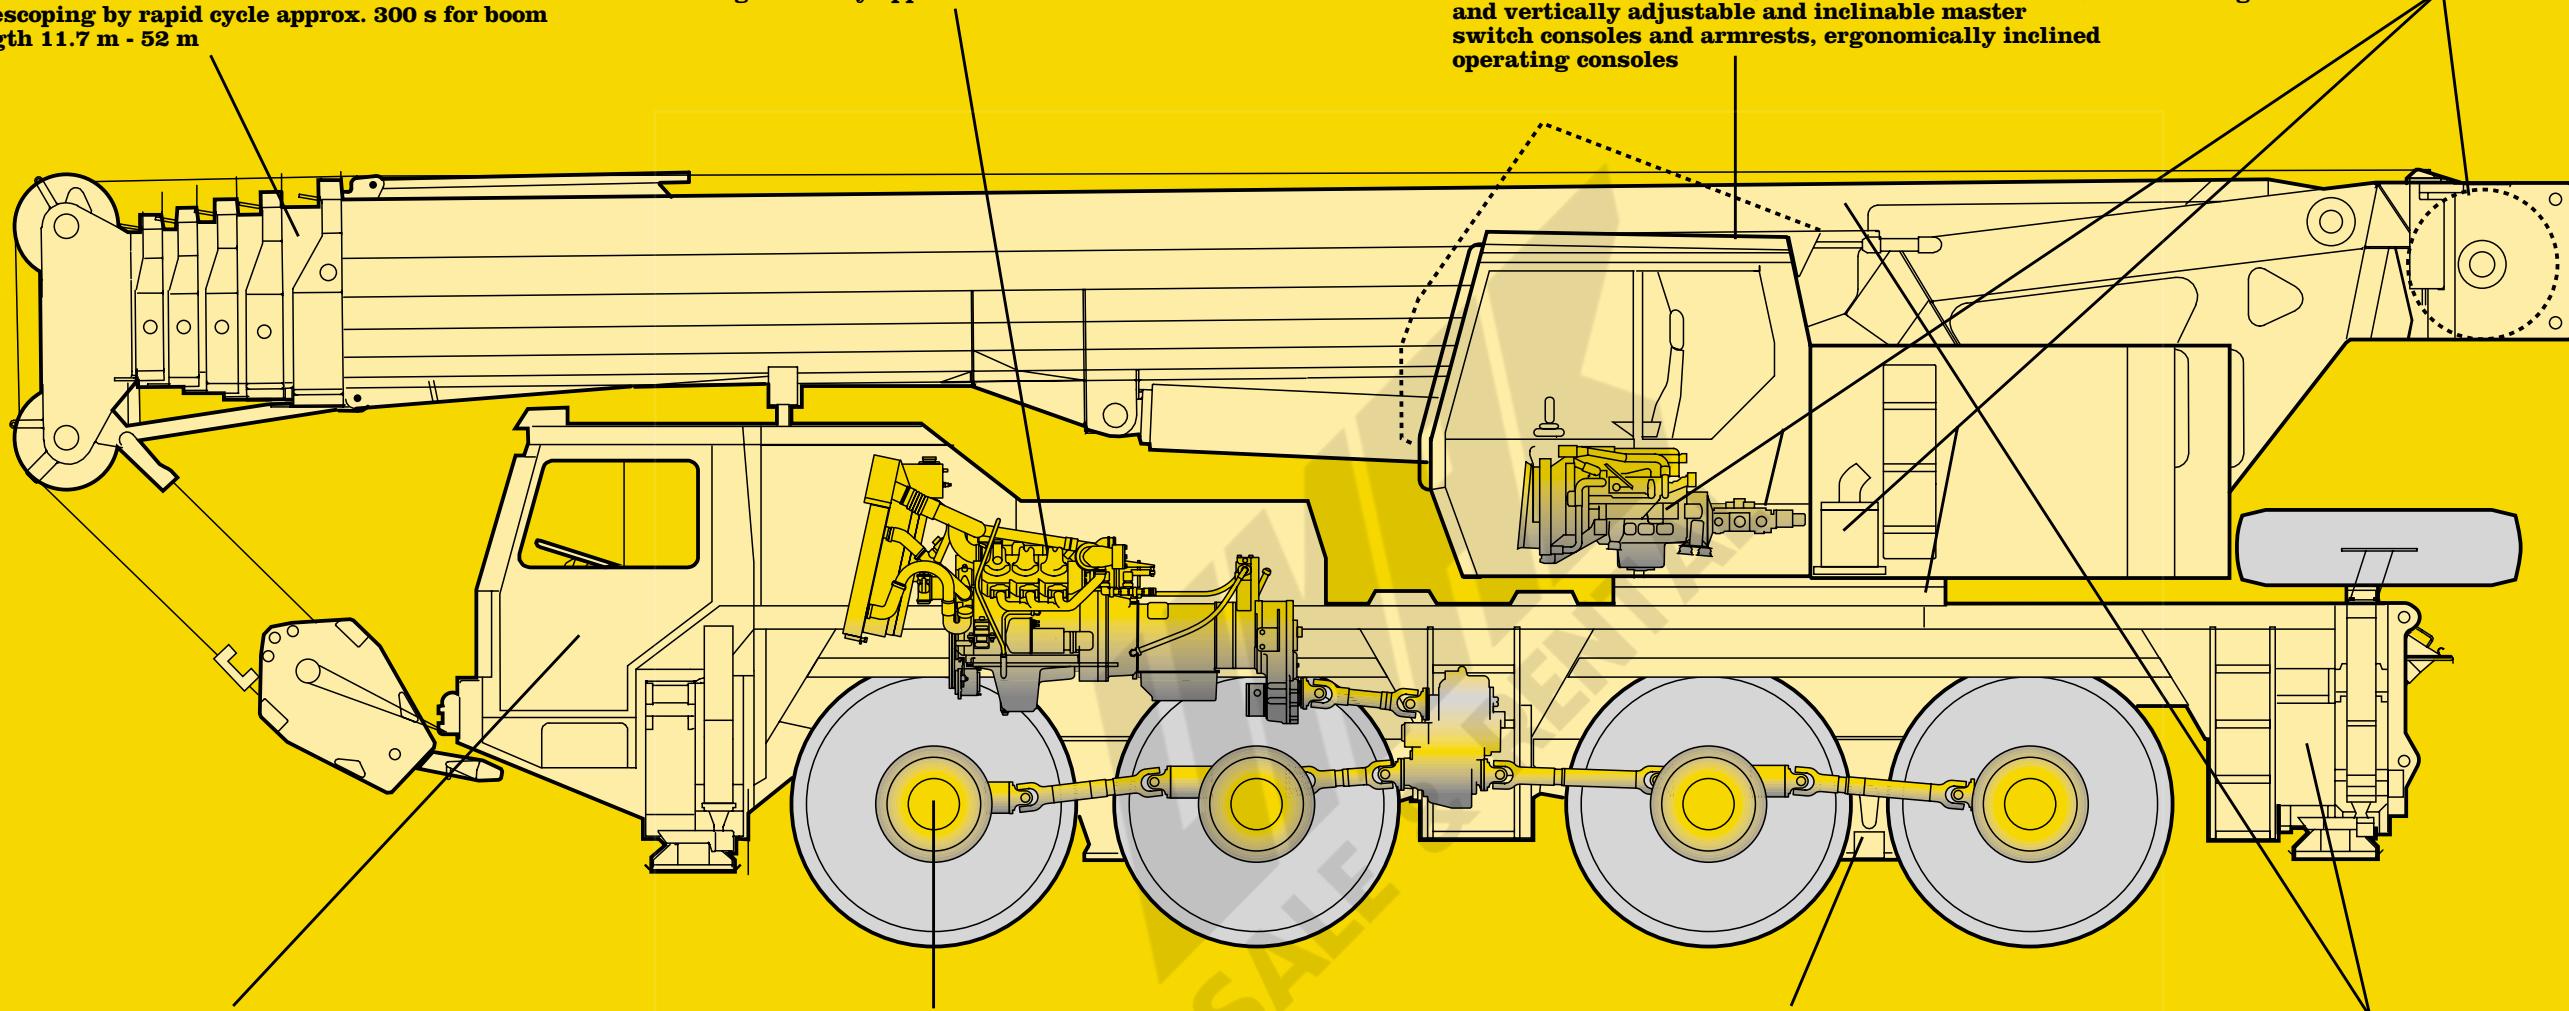

Setting crane on outriggers – quick, convenient and safe.

- Variable supporting basis
Outriggers retracted
Supporting basis 5 m x 8.5 m
Supporting basis 7.2 m x 8.5 m
- Supporting pads remain on rams and are protected by splash guards
- Travel of supporting rams 700 mm
- 2 x 8° lateral inclination of carrier and crane superstructure
- Electronic inclination display
- Supporting pressure display and automatic sliding outrigger control (optional)
- Outrigger control from crane cab (optional)
- Illuminated and dirt-protected reflecting levels
- Operation of outrigger system in accordance with the rules for the prevention of accidents

The LTM 1090/2 - more efficient through advanced technology.

Torsional rigid telescopic boom.

- New oviform boom cross-section of particular inherent stability
- Maintenance-free polyamide slide pads of telescopes
- First-rate lifting capacities, e.g.
25.6 t at 10 m radius
9.4 t at 20 m radius
4.7 t at 30 m radius
2.4 t at 40 m radius
1.4 t at 50 m radius
- Telescoping with approx. 20 % of rated load practicable
- Telescoping by rapid cycle approx. 300 s for boom length 11.7 m - 52 m

Highly comfortable driving cab.

- Galvanized driving cab over width of vehicle, with internal sound and heat insulating panelling, comfortably equipped
- Air-cushioned driver's seat with pneumatic lumbar support
- Standardized and ergonomically located operating and control elements
- Steering wheel adjustable in height and inclination
- Heatable exterior mirrors

Modern and powerful carrier drive.

- 6-cylinder Liebherr turbocharged Diesel engine of 300 kW/408 h.p. (Euro II), robust and reliable
- Entire exhaust gas system of stainless steel
- Allison automatic transmission with torque converter, electronic control, proved and well tested serial transmission, 5 forward and 1 reverse speed, rough-terrain ratio
- Wear resisting TELMA-type eddy current brake, standard equipment
- Max. driving speed 77 km/h, max. gradability approx. 60 %

Outstanding carrier technology for on-road and off-road application.

- Weight-optimized axles, almost maintenance-free, made of high-tensile steel, perfect track keeping and lateral stability due to special control linkage arrangement
- The maintenance-free steering knuckles are steel mounted
- The perfected and robust axles are manufactured in large series and are troublefree components
- The cardan shafts are maintenance-free; easy and quick fitting of the cardan shafts due to 70° diagonal toothed and 4 fixing screws

Spacious crane cab with armrest-integrated control levers.

- Galvanized crane cab with internal sound and heat insulating panelling, tinted panes allround, front knockout window with large parallel windscreen wiper, large skylight of bullet-proof glass with large parallel windscreen wiper, roller blind on front window and skylight, space saving sliding door
- Cab tiltable backwards by 20°
- Operator's seat with pneumatic lumbar support
- Convenient armrest-integrated controls, horizontally and vertically adjustable and inclinable master switch consoles and armrests, ergonomically inclined operating consoles

Liebherr components, reliable and easy-to-service.

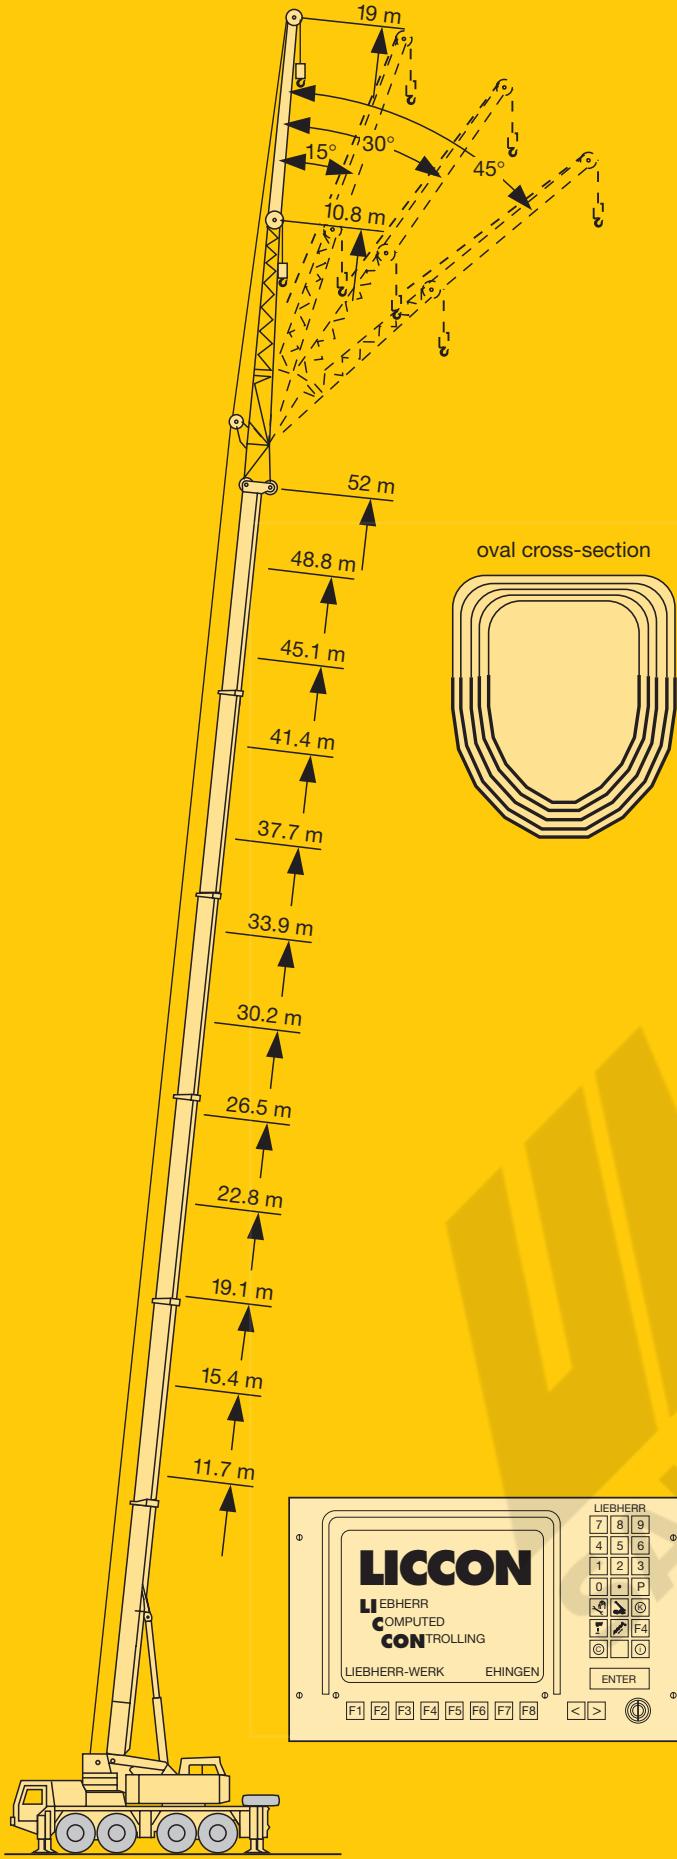

- Crane engine: 4-cylinder Liebherr turbocharged Diesel engine of 125 kW/170 h.p., robust and reliable, located adjacent to crane cab, thus less noise pollution; exhaust gas system of stainless steel
- Slewing rim, slewing ring, winches and the axial piston variable displacement twin pump are self-produced Liebherr components and are specifically matched for the application on mobile cranes
- Centralized lubricating system for slewing rim, boom bearing application and bearings of winches and luffing ram

Niveumatik suspension – preserving crane and roads.

- Maintenance-free suspension rams, free of lateral forces; protected by synthetic tubes
- Level adjustment (suspension on "travelling mode") can be activated automatically by push-button from any position
- Stable cornering ability due to cross mounting of the hydropneumatic suspension
- Axle locking system (locking of suspension for travelling with load) integrated into suspension ram and controllable from driving cab
- Travel of suspension system +150 mm and -100 mm respectively

Weight-optimized steel structure.

- Carrier, superstructure and telescopic boom in light-gauge design, calculated by the FEM method, weight-optimized and of outstanding torsional rigidity
- Tensile property of material with high safety factor through the application of STE 960 (960 N/mm²) for all supporting members

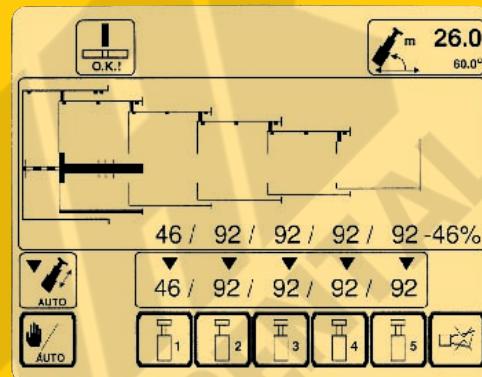

Lifting loads – precise and safe.

- 6-section, 52 m long telescopic boom and 19 m biparted swing-away jib for 72 m height under hook and 56 m radius
- Rigging of swing-away jib practicable at 0°, 15°, 30° or 45°, hydraulic rigging aid
- Optimal utilization of telescopic boom through 23 different telescoping options
- The LICCON system calculates the optimal load curve at any boom length
- Simple and quick rereeing of hoist rope through modern self-locking rope dead end connection

LICCON assisted telescoping system.

- Telescoping by means of a single action hydraulic ram with a pneumatic driving pin
- Telescoping procedure controllable on the LICCON monitor, assisted by a convenient operator's guide, precise approach of interlocking positions
- Loads telescopable are indicated on the operating display
- Rapid cycle telescoping system with "automatic mode", i.e. automatic telescoping to the boom length desired
- Particularly light-weight telescoping system, thus increase of lifting capacities, especially with long booms and at large radii
- Automatic cushioning in end positions during telescoping and retracting for preserving structural members

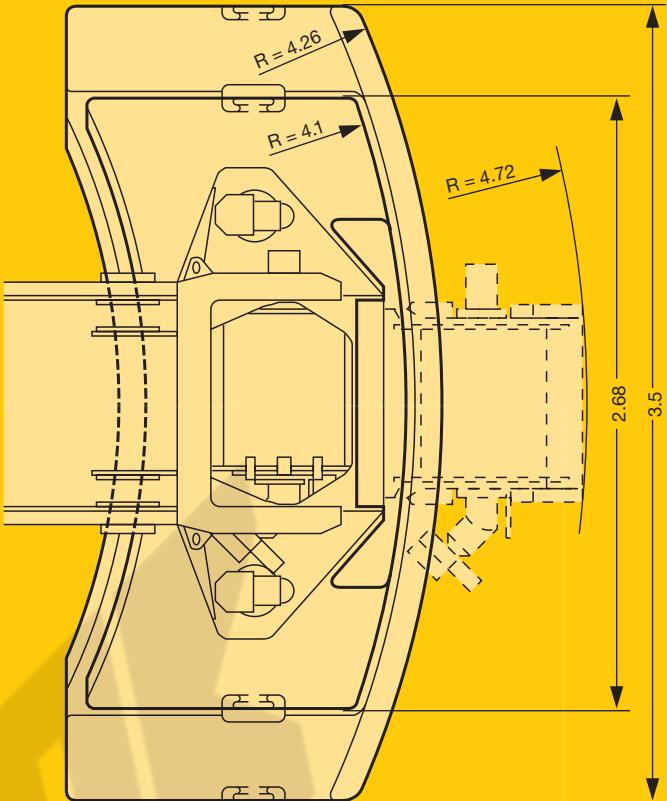

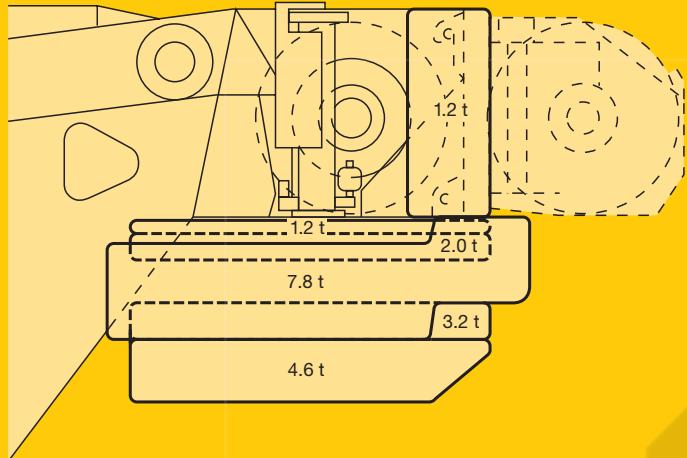

LICCON computer with SLI, test system and PLC control.

- Setting of crane configuration by convenient conversational mode functions
- Reliable acknowledgement of crane configuration set
- Representation of all essential data by graphic symbols within the operating display
- Integrated wind speed control (optional)
- Reliable cut-off device in the event of exceeding the permissible load moments
- Indication of lifting capacities for any boom intermediate length
- Winch indications for load hook course with zero adjuster for ultra-precise lifting/lowering
- Test system for servicing, providing the facility of checking all sensors and consumers within the system on the monitor
- Convenient programmable logical control (PLC) for winches, slewing gear, luffing and telescoping motions

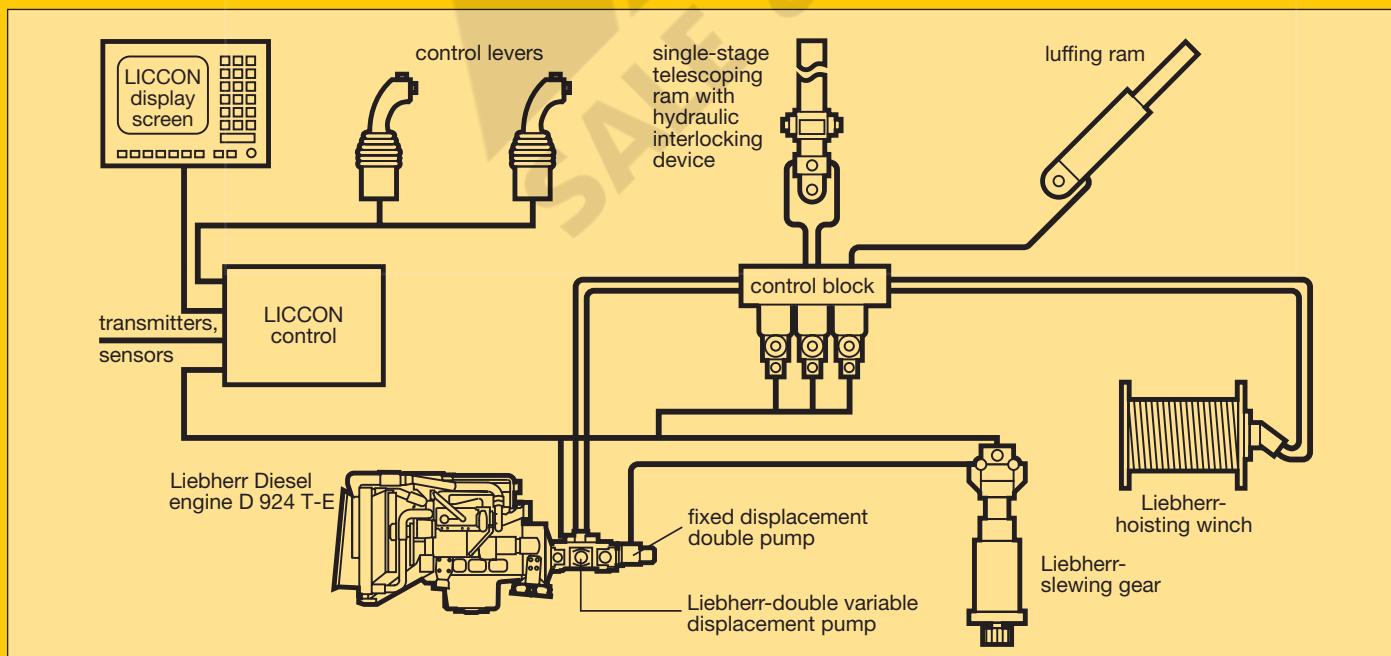

The ballasting system for more flexibility.

- Counterweight variants: 1.2 t, 3 t, 7 t, 12.2 t, and 20 t, thus a wider range of application facilities
- Handling of counterweight controlled from crane cab; not requiring the assistance of an auxiliary crane
- Compact counterweight dimensions; e.g. 12.2 t counterweight have a width of 2.68 m only

Electric/electronic crane control with integrated safe load indicator.

- Control of winches, slewing gear as well as of luffing and telescoping motions via LICCON system
- Summation regulated control, i.e. both pumps can be switched to one consumer
- Load sensing system with electrical activation, four working motions can be performed independently from one another
- High-speed activation also possible during a working motion
- Hoisting/lowering, luffing and slewing speeds preselectable in 6 steps
- Extremely short response times when initiating working motions
- Functional test of all essential components by test system

LTM 1090/2

Frame:	Liebherr designed and manufactured, box type, torsion resistant, all-welded construction made of high-tensile structural steel.
Outriggers:	4-point support, all-hydraulic horizontal and vertical operation.
Engine:	6 cylinder, watercooled Liebherr Diesel, type D 9406 TI, 300 kW (408 HP) at 2100 rpm acc. to EEC standard (EURO 2), max. torque 1250 lbs·ft at 1500 rpm. Fuel tank capacity: 106 gallons.
Transmission:	Allison automatic transmission with torque converter and hydrodynamic retarder brake, 5 forward and 1 reverse speed. Transfer case with off-road range.
Axles:	All axles steered. Axles 1, 3 and 4 with planetary gears and differential locks.
Suspension:	All axles with hydropneumatic suspension and hydraulic locking facility.
Tyres:	8 tyres. Tyre size: 16.00 R 25.
Steering:	Hydraulic power steering with dual circuit hydraulic system, mechanical/hydrostatic from lower cab. Stand-by steering pump. Steering acc. to EC directive 70/311/EEC.
Brakes:	Service brake: Dual circuit, servo-air brake, acting on all wheels. TELMA type eddy current brake (wear resisting retarder). Hand brake: by spring action on all wheels of axles 2, 3 and 4. Brakes acc. to EC directive 71/320/EEC.
Driver's cab:	Spacious all-steel cab on resilient mountings, safety glass windows and full range of instruments.
Electrical system:	24 V DC, 2 batteries, lighting according to countries' regulations.

Crane superstructure.

Frame:	Liebherr-made, torsion-resistant, welded construction made of high-tensile structural steel. Connection to truck chassis by triple roller slewing ring, designed for 360° continuous rotation.
Crane engine:	4 cylinder, watercooled Liebherr Diesel, type D 914 TI, 125 kW (170 HP) at 1800 rpm acc. to DIN, max. torque 523 lbs·ft at 1400 rpm. Fuel tank capacity: 79 gallons.
Crane drive:	Diesel-hydraulic, with 1 duplex axial-piston pump with automatic output control, 1 duplex gear-type pump, open regulated hydraulic circuits.
Crane control:	By 2 control levers (joy stick type).
Hoist gear:	Axial piston fixed displacement motor, hoist drum with integrated planetary gear and spring loaded static brake.
Luffing gear:	1 differential hydraulic ram with safety check valve.
Slewing gear:	Axial piston fixed displacement motor, planetary gear, spring loaded static brake.
Crane cab:	All-steel construction fully galvanized, safety glazing, heater, controls and instruments.
Safety devices:	LICCON safe load indicator, hoist limit switch, safety valves against rupture of pipe and hoses.
Telescopic boom:	1 base section and 5 telescopic sections, hydraulically extendable under load. All sections extendable independently. Boom length: 38 ft to 171 ft.
Electrical system:	24 V DC, 2 batteries.

Complementary equipment.

Folding jib:	35 ft to 62 ft long, for mounting on telescopic boom at 0°, 15°, 30° or 45°.
2nd hoist gear:	For two-hook operation, or with folding jib in case main hoist shall remain reeved.
Drive 8 x 8:	Axle 2 additionally driven.

Other items of equipment available on request.

Das Kranfahrgestell.

LTM 1090/2

Rahmen:	Eigengefertigte, verwindungssteife Kastenkonstruktion aus hochfestem Feinkorn-Baustahl.
Abstützungen:	4-Punkt-Abstützung, horizontal und vertikal vollhydraulisch ausschiebar.
Motor:	8-Zylinder-Diesel, Fabrikat Liebherr, Typ D 9406 TI-E, wassergekühlt, Leistung 300 kW (408 PS) bei 2100 min⁻¹ nach ECE-R 24.03 und ECE-R 49.02 (EURO II), max. Drehmoment 1700 Nm bei 1500 min⁻¹. Kraftstoffbehälter: 400 l.
Getriebe:	Allison-Automatik-Getriebe, Typ HD 4560, mit Drehmomentwandler. 6 Vorwärts- und 1 Rückwärtsgang. Verteilergetriebe mit Geländestufe.
Achsen:	Alle 4 Achsen hydropneumatisch gefedert. Alle Achsen gelenkt. Achsen 1, 3 und 4 sind Planetenachsen mit Differentialsperren.
Federung:	Alle Achsen sind hydropneumatisch gefedert und hydraulisch blockierbar.
Bereifung:	8fach. Reifengröße: 16.00 R 25.
Lenkung:	Hydolenkung mit 2-Kreisanlage. Bedienung mechanisch/hydrostatisch aus dem Fahrerhaus. Reservelenkpumpe. Lenkung entsprechend EG-Richtlinie 70/311/EWG.
Bremsen:	Betriebsbremse: Allrad-Servo-Druckluftbremse, 2-Kreisanlage. Telma-Wirbelstrombremse (verschleißlose Dauerbremse). Handbremse: Federspeicher auf die Räder der 2., 3. und 4. Achse wirkend. Bremsen entsprechend EG-Richtlinie 71/320/EWG.
Fahrerhaus:	Großräumige Kabine in Stahlblechausführung, gummielastisch aufgehängt, Sicherheitsverglasung, Kontrollinstrumente.
Elektr. Anlage:	24 Volt Gleichstrom, 2 Batterien, Beleuchtung nach StVZO.

Der Kranoberwagen.

Rahmen:	Eigengefertigte, verwindungssteife Schweißkonstruktion aus hochfestem Feinkorn-Baustahl. Als Verbindungselement zum Kranfahrgestell dient eine 3reihige Rollendrehverbindung, die unbegrenztes Drehen ermöglicht.
Kranmotor:	4 -Zylinder-Diesel, Fabrikat Liebherr, Typ D 924 T-E, wassergekühlt, Leistung 120 kW (163 PS) bei 1800 min⁻¹ nach EPA/CARB und IMO 1 entsprechend ISO 8178 C 1, max. Drehmoment 720 Nm bei 1200 min⁻¹. Kraftstoffbehälter: 300 l.
Kranantrieb:	Diesel-hydraulisch mit 1 Axialkolben-Doppelpumpe mit automatischer Leistungsregelung, 1 Zahnrad-Doppelpumpe, offene, geregelte Ölkreisläufe.
Steuerung:	Zwei 4fach Handsteuerhebel, selbstzentrierend.
Hubwerk:	Axialkolben-Konstantmotor, Hubwerkstrommel mit eingebautem Planetengetriebe und federbelasteter Haltebremse.
Wippwerk:	1 Differentialzylinder mit Sicherheitsrückschlagventilen.
Drehwerk:	Axialkolben-Konstantmotor, Planetengetriebe, federbelastete Haltebremse.
Kranfahrerkabine:	Stahlblechausführung, voll verzinkt, mit Sicherheitsverglasung, Heizung, Bedieneungs- und Kontrollinstrumente.
Sicherheits-einrichtungen:	LICCON-Überlastanlage, Hubendbegrenzung, Sicherheitsventile gegen Rohr- und Schlauchbrüche.
Teleskopausleger:	1 Anlenkstück und 5 Teleskopteile, hydraulisch unter Last teleskopierbar. Alle Teleskopteile unabhängig voneinander ausschiebar. Auslegerlänge: 11,7 m --- 52 m.
Elektr. Anlage:	24 Volt Gleichstrom, 2 Batterien.

Die Zusatzausrüstung

Klappspitze:	10,8 m --- 19 m lang, unter 0°, 15°, 30° oder 45° zum Teleskopausleger anbaubar.
2. Hubwerk:	Für den 2-Hakenbetrieb oder bei Betrieb mit Klappspitze, wenn Haupthubseil eingeschert bleiben soll.
Bereifung:	8fach. Reifengröße: 14.00 R 25.
Antrieb 8 x 8:	Zusätzlich wird die 2. Achse angetrieben.

Weitere Zusatzausrüstung auf Anfrage.

Crane carrier.

Frame:	Liebherr designed and manufactured, box type, torsion resistant, all-welded construction made of high-tensile structural steel.
Outriggers:	4-point support, all-hydraulic horizontal and vertical operation.
Engine:	6-cylinder, watercooled Liebherr Diesel, type D 9406 TI, 300 kW (408 hp) at 2100 min ⁻¹ acc. to ECE-R 24.03 and ECE-R 49.02 (EURO II), max. torque 1700 Nm at 1500 min ⁻¹ . Fuel tank capacity: 400 ltrs.
Transmission:	Allison automatic transmission, type HD 4560, with torque converter, 6 forward and 1 reverse speed. Transfer case with off-road range.
Axels:	All axles steered. Axles 1, 3 and 4 with planetary gears and differential locks.
Suspension:	All axles with hydropneumatic suspension and hydraulic locking facility.
Tyres:	8 tyres. Tyre size: 16.00 R 25.
Steering:	Hydraulic power steering with dual circuit hydraulic system, mechanical/hydrostatic from lower cab. Stand-by steering pump. Steering acc. to EC directive 70/311/EEC.
Brakes:	Service brake: Dual circuit, servo-air brake, acting on all wheels. TELMA type eddy current brake (wear resisting retarder). Hand brake: by spring action on all wheels of axles 2, 3 and 4. Brakes acc. to EC directive 71/320/EEC.
Driver's cab:	Spacious all-steel cab on resilient mountings, safety glass windows and full range of instruments.
Electrical system:	24 V DC, 2 batteries, lighting according to countries' regulations.

Crane superstructure.

Frame:	Liebherr-made, torsion-resistant, welded construction made of high-tensile structural steel. Connection to truck chassis by triple roller slewing ring, designed for 360 ° continuous rotation.
Crane engine:	4 cylinder, watercooled Liebherr Diesel, type D 924 T-E, 120 kW (163 hp) at 1800 min ⁻¹ acc. to EPA/CARB and IMO 1 acc. to ISO 8178 C 1, max. torque 720 Nm at 1200 min ⁻¹ . Fuel tank capacity: 300 ltrs.
Crane drive:	Diesel-hydraulic, with 1 duplex axial-piston pump with automatic output control, 1 duplex gear-type pump, open regulated hydraulic circuits.
Crane control:	By 2 control levers (joy stick type).
Hoist gear:	Axial piston fixed displacement motor, hoist drum with integrated planetary gear and spring loaded static brake.
Luffing gear:	1 differential hydraulic ram with safety check valve.
Slewing gear:	Axial piston fixed displacement motor, planetary gear, spring loaded static brake.
Crane cab:	All-steel construction fully galvanized, safety glazing, heater, controls and instruments.
Safety devices:	LICCON safe load indicator, hoist limit switch, safety valves against rupture of pipe and hoses.
Telescopic boom:	1 base section and 5 telescopic sections, hydraulically extendable under load. All sections extendable independently. Boom length: 11,7 m to 52 m.
Electrical system:	24 V DC, 2 batteries.

Complementary equipment.

Folding jib:	10,8 m to 19 m long, for mounting on telescopic boom at 0°, 15°, 30° or 45°.
2nd hoist gear:	For two-hook operation, or with folding jib in case main hoist shall remain reeved.
Tyres:	8 tyres. Tyre size: 14.00 R 25.
Drive 8 x 8:	Axle 2 additionally driven.

Further equipment available on request.

Châssis porteur.

Châssis:	Fabrication Liebherr, construction en caisson indéformable, en acier grain fin à haute résistance.
Stabilisateurs:	Calage en 4 points, à télescopage horizontal et vérinage vertical entièrement hydrauliques.
Moteur:	Diesel, Liebherr, type D 9406 TI à 6 cylindres, refroidissement par eau, puissance 300 kW (408 ch) à 2100 min ⁻¹ selon ECE-R 24.03 et ECE-R 49.02 (EURO II), couple maxi. 1700 Nm à 1500 min ⁻¹ . Capacité réservoir de carburant: 400 ltrs.
Boîte:	Boîte automatique, marque Allison, type HD 4560, avec convertisseur de couple, 6 rapports AV et 1 AR. Boîte transfert avec rapport tout terrain.
Essieux:	Tous essieux directeurs. Essieux 1, 3 et 4 à train planétaire à blocage de différentiel.
Suspension:	Tous les essieux à suspension hydropneumatique et blocables hydrauliquement.
Pneumatiques:	8 pneumatiques. Dimensions des pneumatiques: 16.00 R 25.
Direction:	Direction hydraulique à deux circuits, commande mécanique/hydrostatique depuis la cabine de conduite. Pompe de direction auxiliaire. Direction selon directive CE 70/311/CEE.
Freins:	Frein de service: Servofrein pneumatique à 2 circuits, agissant sur toutes les roues. Ralentisseur électromagnétique TELMA (sans usure). Frein à main: Par cylindres à ressort, agissant sur les roues des essieux 2, 3 et 4. Freins selon directive CE 71/320/CEE.
Cabine:	Cabine spacieuse, entièrement en tôle d'acier, à suspension élastique, vitrage de sécurité, éléments de contrôle.
Installation électrique:	24 volts continus, 2 batteries, éclairage conforme au code.

Partie tournante.

Châssis:	Fabrication Liebherr, construction soudée indéformable en acier à grain fin de haute résistance. Couronne d'orientation à triple rangées de rouleaux entre partie tournante et châssis porteur permettant une rotation continue.
Moteur:	Diesel, Liebherr, type D 924 T-E, à 4 cylindres, refroidissement par eau, puissance 120 kW (163 ch) à 1800 min ⁻¹ selon EPA/CARB et IMO 1 selon ISO 8178 C 1, couple maxi. 720 Nm à 1200 min ⁻¹ . Capacité réservoir de carburant: 300 ltrs.
Entraînement de grue:	Diesel-hydraulique, comprenant 1 double pompe à pistons axiaux à régulation de puissance, 1 double pompe à engrenages, circuits hydrauliques ouverts contrôlés.
Commande:	Par deux manipulateurs (type manche à balai).
Mécan. de levage:	Moteur hydraulique à cylindrée constante, treuil à réducteur planétaire incorporé et frein d'arrêt à ressort.
Mécan. de relevage:	Vérin hydraulique différentiel avec soupape de retenue.
Mécan. de orientation:	Moteur hydraulique à cylindrée constante, réducteur planétaire, frein d'arrêt à ressort.
Cabine du grutier:	Entièrement en tôle d'acier avec vitrage de sécurité, chauffage, organes de commande et de contrôle.
Dispositifs de sécurité:	Contrôleur de charge LICCON, fin de course de levage, soupapes de sécurité sur tubes et flexibles contre rupture.
